4+ yrs of experience across engineering & product, building & scaling consumer products in e-commerce, fintech & digital payments

EDUCATION

IIM Lucknow, MBA

2023 - 2025

Major: IT, Strategy & Operations

VIT Vellore, B. Tech – Electronics & Communications Engineering

2016 - 2020

PROFESSIONAL EXPERIENCE

MakeMyTrip | Associate Product Manager

Apr'25 – Present

Led product for Flights & Growth across GCC markets — across user acquisition, platform integrations & monetization

- Redesigned acquisition channel strategy to reduce third-party aggregator dependency, shifting direct booking rate from 10% to 16% and **saving ~₹1.3 Cr annually in acquisition costs**
- Led end-to-end onboarding of meta-search and rail distribution partners (Kayak, Etihad Rail) — defined API contracts, pricing attribution, and commercial workflows — **scaled to 22K+ new daily active users**
- Deployed a **predictive ranking model for round-trip flight listings** — defined feature inputs, ranking logic, and success metrics; validated via A/B test → **+7% step-wise conversion.**
- Conceptualised **SQL-driven behavioural recommendation engine** — defined signal selection across booking & post-sales data, scoped eligibility logic with **data engineering for real-time snapshot delivery** → **+15% ancillary attach rate.**
- **Owned pre-sales AI agent** — defined query scope, knowledge boundaries, retrieval architecture, fallback logic, and go-live eval criteria for a **RAG-based system**; targeting 60%+ automated resolution → **↓₹7L agent costs.**
- Built an internal traffic filter for revenue & marketing teams — simple config-based rules to block low-intent requests; **eliminated ~10M daily requests** → **↓₹18.3L infra costs**
- Modelled revenue, cost structure, and cannibalization scenarios for a modular embedded finance integration — single API enabling multiple insurance products — **identifying ~₹4.4 Cr annual revenue opportunity**

MakeMyTrip | Product Intern (*Received Pre-Placement Offer converted to full time*)

Apr'24 – Jun'24

- Analysed **750+ sales calls** & conducted **30+ stakeholder interviews** to identify funnel friction across customer segments
- Conducted SQL-based cohort & market analysis uncovering 5 underpenetrated segments vs industry benchmarks
- Authored 7 PRDs prioritised via RICE framework and presented a consolidated quarterly roadmap to the **COO of Flights**

AMADEUS LABS | Software Developer Engineer

Aug'20 – Jun'23

Built UI components & supported backend systems powering Air Canada's booking platform serving **100M+ annual visits**

- Delivered 20+ production releases across booking and post-sales modules with 10+ global teams at **~95% sprint accuracy**; enhanced WCAG accessibility compliance → **↓45% UI defects.**
- Built backend orchestration for insurance upsell & dynamic pre-payment add-ons within **transactional payment flows**, supporting **commercial packaging strategy** → Attach rate +7%
- Refactored fare & tax computation logic across 5 modules (listing, summary, PDF, email communications) to meet Canadian regulatory standards → passed compliance audit with zero pricing inconsistencies
- Integrated Sherpa API into post-sales modules enabling real-time documentation validation → **post-sales calls ↓ 40%**
- Implemented govt-mandated passenger ID validation across booking & profile modules → **100% regulatory compliance**

ACADEMIC PROJECT & CASE COMPETITION

Accenture Innovation Challenge | **National Finalist (Top 5 / 50K+ teams)**

- Designed EV charging platform with dynamic pricing; modelled unit economics → **~₹10L revenue/asset, ~1-year breakeven**
- Developed GTM strategy & commercial packaging for B2B fuel-station transition, defining pricing-tiers, partner onboarding

Lenskart | Agile Product Development

- Conducted cohort analysis & built business case; translated findings into 18 prioritized user stories across 3 sprint releases
- Defined activation & retention KPIs while achieving **~96% sprint est. accuracy** to support predictable release velocity

SKILLS & CERTIFICATIONS

- **Product:** Product Discovery, Roadmap & Backlog Prioritization, Experimentation (A/B Testing), Activation & Retention, Go To Market, Monetization Strategy, Financial Modelling, KPI Definition, Sprint & Release Planning
- **Technical:** REST API Integrations, SQL, JSON (API Payloads), MongoDB, Python (Data Analysis)
- **Tools:** Jira, Confluence, MS Excel (Financial Modelling), PowerPoint (Executive Decks), Figma, Mixpanel, Google Analytics, Adobe Omniture, Postman, Swagger, Scalyr
- **Certifications:** Microsoft Certified: Azure Fundamentals, Certified SAFe 5 Practitioner
